

Are You Well-Architected?

Well-Architected Review for AWS

Optimization and remediation of your AWS Architecture*

*Receive up to \$5,000 per workload in AWS credits.

WHAT IS A WELL-ARCHITECTED REVIEW?

Leveraging the power of the cloud may seem simple, but are you getting the most from your investment? Gain the peace of mind that your workloads align with your company's business and technical objectives, your security is top-notch and your performance and operations are optimized and efficient.

Included with this service is an AWS approved, detailed report containing a prioritized list of specific opportunities for improvement in 5 key areas: Operations, Security, Reliability, Performance and Cost. AWS will provide up to **\$5,000 in service credit per workload**, to offset the cost of remediating the high-risk findings.

AWS Well-Architected Framework Pillars:

OPERATIONAL EXCELLENCE

Run and monitor systems to deliver business value and continually improve supporting processes and procedures.

SECURITY

Protect information, systems, and assets while delivering business value through risk assessments and mitigation strategies.

RELIABILITY

Recover from infrastructure or service failures, dynamically acquire computing resources to meet demand, and mitigate disruptions.

PERFORMANCE EFFICIENCY

Use computing resources efficiently to meet system requirements, and to maintain that efficiency as demand changes and technologies evolve.

COST OPTIMIZATION

Avoid and eliminate unneeded cost or suboptimal resources with cost-effective resources, matched supply and demand, and expenditure awareness.

About Jacobian Engineering

We have been providing managed and professional services to customers for nearly 14 years.

As an Advanced Consulting Partner and channel reseller with AWS, Jacobian has strong competencies in healthcare, cloud security, devOps, software dev, and migration.

Companies who are well-architected save money, improve performance, achieve operational excellence, increase reliability and strengthen security of their workloads.
